Personal Profile

Junior developer with a broad skill set that includes experience in several programming languages, web development tools, and networking technologies. My expertise in Python enables me to build high-quality, robust applications and programs. I'm also skilled in using HTML and CSS to create visually appealing, user-friendly websites that are optimized for search engines. I have experience using Wix to create websites quickly and efficiently, and I'm comfortable with Photoshop for image optimization. When it comes to programming, I prefer Visual Studio Code because of its powerful features and intuitive interface. I'm familiar with stack machine architecture and AVR programming, which allows me to work efficiently and effectively on a variety of projects. My experience in networking includes an understanding of switching and routing, as well as the fundamentals of how networks work. I'm able to troubleshoot common network issues and have experience in configuring switches and routers to optimize network performance.

I'm a dedicated and hard-working junior developer with a passion for learning and growing in the field of software development. My diverse skill set and willingness to take on new challenges make me a valuable addition to any team.

Key Skills

- Python programming: programming concepts, syntax, and libraries.
- Web development: HTML, CSS, and Wix, and Photoshop.
- Visual Studio Code: code editing, debugging, and deploying code quickly and efficiently.
- Stack machine and AVR.
- Networking and routing: troubleshoot common network issues and configure switches and routers to optimize network performance.
